

PRODUCT REVIEW

Handling

Convoyor

The Roxane conveyors are fixed transport equipment allowing the automated transports of all types of material, production tanks or packaging between the different workstations and equipment. Conveyor control tools organize and secure the movements performed.

Avantages

Sequence programming

Speed regulation

Autonomy

Remote control

Organisation

The combined use of recognition systems (barcodes, datamatrix, QR codes), automatic shuttles, lifts and automatic storage robots allow the complete automation of the routing and storage processes of your production process.
